

Model ATS-98

AINES
ATS-98 &
2000 SERIES
CRAFT TEST SETS

The Aines Manufacturing Corp. ATS-98 & 2000 Series Telephone Craftpersons Test Sets are all constructed of high impact polyamid plastic for survival of all drop tests presently utilized in field testing (up to 20 feet or 6 meters). All units are weather resistant including the transmitter and receiver stations. The battery compartment is separated from the electronics section to provide additional water resistance. The test set cords are field replaceable and accessed under the battery compartment. Each set is equipped with a water-tight gasket around the two halves of the case and the cord to insure water tightness. All sets offer GROUND START function without the need for special cords and come equipped with AUTO-RINGER automatic ring sensing providing automatic ring detection without the need to have a ringer in the circuit. This provides additional high impedance protection against activating data circuits. All ATS-98 & 2000 Series test sets are data safe in the MONITOR mode.

AINES
MANUFACTURING CORP.

ATS-98 & 2000 SERIES FEATURES

Tone/Pulse dialing
Last number redial
10 Number Storage (18 digits)
